

Da **Kali**, scaricare e provare **Tor Browser** (senza modificare alcuna impostazione predefinita).

Effettuare qualche navigazione sulla rete tor ed effettuare screenshot per il report

SVOLGIMENTO

Dopo aver effettuato l'accesso alla macchina **Kali**, apriremo il browser per scaricare **TOR** e procederemo con l'estrazione del file, **Figura 1**.

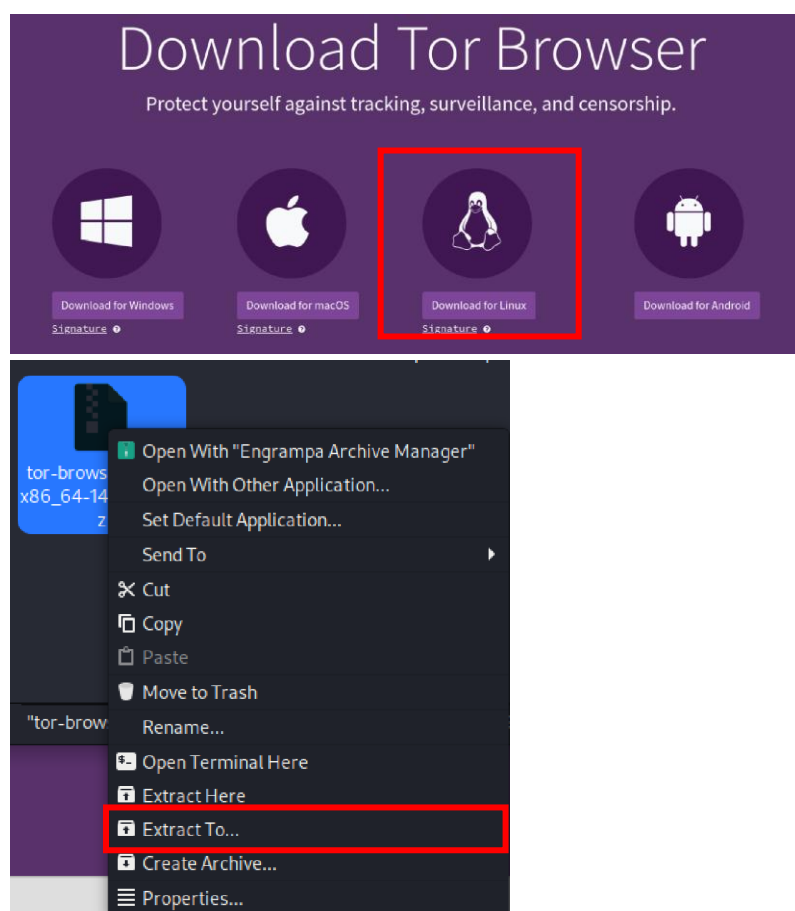

Figura 1, viene scaricato il file relativo ai sistemi Linux e se ne estrae il contenuto.

A questo punto saremo pronti per navigare nel **Dark Web**. Apriamo **Tor** e selezioniamo connect. **Figura 2**

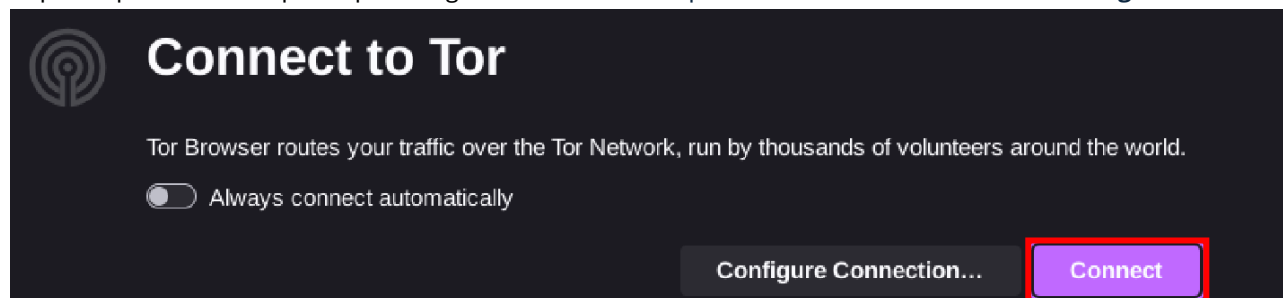

Figura 2, viene selezionato connect per procedere con la connessione.

Andiamo infine ad effettuare delle ricerche di prova, per prima cosa possiamo controllare il nostro IP per vedere se sia stato effettivamente mascherato, nel caso specifico l'IP sarà: 109.70.100.6 registrato in Austria a Vienna.

Figura 3

What is my IP?	
109.70.100.6	
Please scroll down to see your IPv6 (if found), and the geolocation details (Country, City, ISP, etc...) of your IP	
Details:	
Your IPv4	109.70.100.6
Your IPv6	2a03:e600:100:6
Country	Austria
Region	Vienna
City	Vienna
ZIP	1020
Timezone	Europe/Vienna
Internet Service Provider (ISP)	Foundation for Applied Privacy
Organization	Foundation Applied Privacy
AS number and name	AS208323 Foundation for Applied Privacy
User agent	Mozilla/5.0 (X11; Linux x86_64; rv:128.0) Gecko/20100101 Firefox/128.0

Figura 3, l'ip mascherato all'interno di Tor Browser.

Procediamo ora cercando **“hidden wiki”**, **Figura 4**, questo era inizialmente un servizio **.onion** sulla rete **Tor** che aveva lo scopo di fornire link verso siti che consentissero il perseguimento di attività illecite. Ovviamente nel caso dei siti che sono reperibili in maniera più superficiale si tratta tendenzialmente di siti truffa o di siti controllati direttamente dalle forze dell'ordine.

Hidden Wiki

Hidden Wiki was originally the name of a .onion hidden service on the tor network, and it was hosting a directory for links to websites on the tor dark web.

The first version was created in 2007, and every few years there was a new domain. In 2015 the Hidden Wiki was seized by law enforcement. But like a hydra, new alternative sites have been created. One of those sites is [Hidden.Wiki](#)

Or check out the original hidden wiki at http://zqkltwluavvvgqt4ybvgt7tyo4hj5xgtuvpdf6ofjycgwbym2gad.onion/wiki/index.php/Main_Page

Or go to The Hidden Wiki via it's [onion.ws](#) link [here](#).

How To Access The Dark Web Links On The Hidden Wiki

1. You need to download and install the [Torbrowser](#)
2. With the Torbrowser go to [Hidden.Wiki](#) again and bookmark the site.
3. Now you can browse the dark web just by clicking the .onion URLs on this website.

Hidden Wiki Alternatives

Figura 4, Hidden Wiki.

Da qui poi come segue in **Figura 5** possiamo proseguire accedendo, nello specifico a due link, il primo per la vendita illegale di armi e il secondo per il traffico di carte di credito. Come detto in precedenza è molto alta la probabilità che si tratti in questo caso di siti controllati da forze dell'ordine.

Walther PPK, Kal.7,65

New and unused and unregistered!
Arms can only be purchased if you also buy the gun.

Product	Price	Quantity
Walther PPK, Kal 7,65	600 EUR = 0.00611 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
Ammo, 30 Rounds	40 EUR = 0.0041 \$	1 <input type="text"/> <input type="button" value="Buy now"/>

Desert Eagle IMI, Kal.44

New and unused and unregistered!
Arms can only be purchased if you also buy the gun.

Product	Price	Quantity
Desert Eagle IMI, Kal.44	1250 EUR = 0.01274 \$	1 <input type="text"/> <input type="button" value="Buy now"/>

USA CVV KNOWN BALANCE

You will get a High Quality known balance cc (100% live not some rubbish cards like my competitor ones) !
You will get the current balance (how much is owed to bank by CH) ! You will get available credit (so you know exactly how much to charge) !
You will also get last statement, date rem-out and next statement due (amount just so you get your head round it (in case your method takes a while you know exactly how to move around it.

You will receive the following card format:
CC number (expiry / CVV / first name / last name / address / city / State / zipcode / email / phone number (where available) / current balance / available credit) !

Cards designed for Paypal/stripe/square/venmo no more wasting time and money trying to find a card that works, with me you will hit first time guaranteed!
Always bought cards not knowing how much to charge, and worried about charging too much and killing the card? NOT with my cards, you will know EXACTLY how much is in there so you can charge it without worrying !

Happy buying !

Product	Price	Quantity
10 x cards with credit from 1000 to 5000 USD	90 USD = 0.00086 \$	<input type="button" value="Sold out"/>
50 x cards with credit from 1000 to 5000 USD	350 USD = 0.00343 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
10 x cards with credit from 5000 to 20000 USD	120 USD = 0.00118 \$	<input type="button" value="Sold out"/>
50 x cards with credit from 5000 to 20000 USD	450 USD = 0.00441 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
10 x cards with credit from 20000 to 50000 USD	180 USD = 0.00177 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
50 x cards with credit from 20000 to 50000 USD	650 USD = 0.00638 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
10 x non verified by visa cards 5000 - 100000 USD	250 USD = 0.00245 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
50 x non verified by visa cards 5000 - 100000 USD	800 USD = 0.00785 \$	1 <input type="text"/> <input type="button" value="Buy now"/>
